PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of demonstrated experience in architecting and deploying scalable web applications using JavaScript, TypeScript, React.js, and Node.js. Proven track record of translating complex technical specifications into high-performance software solutions, optimizing code quality, and driving efficient Agile sprint deliveries.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Node.js, HTML5, CSS3, SQL

Tools & Platforms: Git, GitHub, Docker, MongoDB, Postman, Jira

Competencies: Agile/Scrum, RESTful APIs, Frontend Architecture, System Design

WORK EXPERIENCE

Software Developer — NexaTech Solutions

June 2022 - Present

- Architected and maintained responsive React web applications, enhancing frontend responsiveness and user experience. [Add measurable result if available, e.g. % improvement or scale]
- Identified and resolved complex frontend defects and modernized core UI components to maintain high application uptime.
- Collaborated with cross-functional engineering teams to design and integrate robust RESTful backend APIs and database queries.
- Actively contributed to Agile Scrum ceremonies including sprint planning, daily standups, and retrospective reviews.
- Executed comprehensive unit and integration testing workflows to ensure zero-regression deployments.

Junior Web Developer — Apex Digital Studio

January 2021 - May 2022

- Developed semantic, high-performance web pages utilizing HTML, CSS and JavaScript with emphasis on responsive design and cross-browser reliability.
- Independently delivered sprint user stories and feature tickets prioritized in Jira, meeting strict milestone deadlines.
- Implemented mobile-first responsive stylesheets and intuitive UX layouts across diverse viewport sizes.
- Partnered with multidisciplinary stakeholders to consistently ship production deliverables within scheduled deadlines.

EDUCATION

Bachelor of Science in Computer Science

2017 - 2021

University of Texas at Austin
